SECTION B

Section B.3 (c) (3) change to read as follows: PBIs must be achieved within the cost and funding profile set forth in paragraph B.3 (b) above unless the profile is modified pursuant to (c) (7) or (c) (9).

Section B.3 (c) (4) change the first PBI from “Secretarial Decision whether to Recommend Site to President” to “DOE Issues Site Recommendation to the President.”

Section B.3 (c) add:

- (9) Changes to the fee pool, funding levels, or milestones identified in this clause may be made with the occurrence of any of the following (a) through (c).

(a) Assumptions

The milestone, budgets, and requirements are based upon a set of assumptions which OCRWM is currently operating under. Should the basis for those assumptions change, the milestone, budgets and/or requirements may also change. Assumptions which do not impact level 2 or higher milestones will not change the fee pool or performance based milestones. A discussion of milestone levels is contained in the Strategic System Management Policy.

(b) Funding Levels

OCRWM has established funding levels and/or Total System Life Cycle Costs (TSLCC) necessary to meet the program mission. Annually budget requests are submitted to Congress to support the program. If Congress does not appropriate sufficient funds to support the program mission, DOE may change the milestone and/or requirements to stay within the appropriated funding. Anytime the actual funding varies plus or minus 10 percent of the requested funding level upon which the fee pool is based, as discussed in (7) above, a change to the fee pool amount and related requirements and/or milestone may be processed through the change control system to change the baseline with a subsequent change to the PEMP.

(c) Beyond the Control/Influence

There are certain instances when changes to program mission, milestones and/or requirements may be beyond the control/influence of either DOE or the Contractor. Changes which may fall into this category are litigation, lawsuits, and legislation. Some examples may include expanding the repository to include more fuel than currently defined in legislation, acceptance of fuel earlier than anticipated, changing the radiation standards, etc. Additionally, decision makers may or may not make timely decisions based on circumstances outside the control/influence of the contractor.

Examples of instances within the contractor's control or influence are quality and completeness of the documents submitted and quality, completeness and timeliness of the contractor's response to questions/concerns/issues with documents submitted.
